RECORDING SHEET AND RECORDED MATTER
ASAHI GLASS CO LTD

Inventor(s):TANUMA TOSHIHIRO

Application No. 11305655 JP11305655 JP, Filed 19991027, Published 20010508

Abstract: PROBLEM TO BE SOLVED: To obtain a recording sheet and a recorded matter having good ink absorbability and good dye fixability and no fading even for a long term preservation after printing.

SOLUTION: The recording sheet comprises a porous ink receiving layer containing a hindered amine compound and a salt of an acid on a base material. The recorded matter comprises an ink receiving layer containing a hindered amine compound and a salt of an acid on a base material in such a manner that a dye is carried to the layer.
